Attention !

Ne regardez surtout pas le Soleil directement avec un télescope, en particulier s'il est ouvert ou non équipé d'un filtre solaire. Cela peut entraîner des lésions oculaires graves et irréversibles.

L'observation solaire nécessite des filtres certifiés spécialement conçus à cet effet.

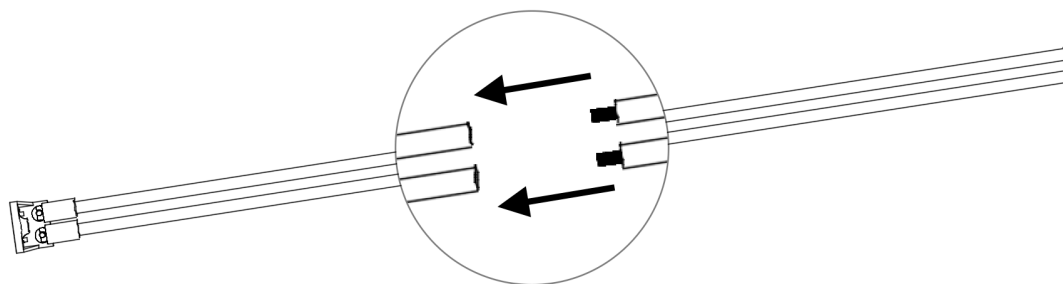

Warning !

Never look directly at the Sun through a telescope, especially if it is open or lacks a proper solar filter. This can cause serious and irreversible eye damage. Solar observation requires specially designed and certified filters.
